Traffic Sources

Where visitors are coming from — Nov 2025 to Apr 2026

SESSIONS BY CHANNEL

Direct	8,876	↑ +24%
Referral	4,612	↑ +10%
Organic Search	2,122	→ +3%
Organic Social	213	↓ -49%

CHANNEL HIGHLIGHTS

Direct traffic up 24%

Strong growth suggests improved brand awareness — people actively seeking ComXo rather than discovering it for the first time.

Referral visitors: 69% engagement rate

The most engaged channel on the site — high-intent arrivals from partner, directory, or press links.

📉 **Organic social down 49%**

Social referrals have halved year-on-year. If LinkedIn output has reduced, this is almost certainly the cause.

FEATURE SPOTLIGHT

Calculator Performance Has Transformed

Since the update — including the addition of the whitepaper — visitors are spending 50% longer on the page and engaging at a rate that's nearly doubled compared to the same period last year.

ENGAGEMENT RATE	AVG. SESSION DURATION	FORM INTERACTIONS
72.8%	1m 30s	21
↑ +24pp · was 49.1%	↑ +50% · was 60s	↑ +24% · was 17

ⓘ The whitepaper download isn't currently appearing as a tracked event in GA4 — worth a quick check on the setup so future downloads are captured in the data.

Contact & Lead Generation

Business enquiry forms — excluding job applications

CONTACT FORM STARTS	CONTACT FORM SUBMITS	CALCULATOR FORM STARTS	IMPACT CALC. INTERACTIONS
18	7	21	9
↑ +125% vs 8	↑ +600% vs 1	↑ +24% vs 17	New vs 0

🎯

Contact enquiries up 7× year-on-year

Going from 1 to 7 contact form completions in a comparable period is the most significant commercial signal in the data. The start-to-submit conversion rate is broadly stable, so it's increased volume driving the gain.

Organic Search Authority

Ahrefs estimated traffic & domain strength — Nov 2024 to Apr 2026

ESTIMATED ORGANIC VISITS (AHREFS)

DOMAIN RATING HISTORY

📊

Organic recovering strongly from the Nov 2025 trough

Estimated organic visits bottomed at ~101 in November 2025. April 2026 is already tracking at 159 — a 57% recovery, returning to 2025 mid-year levels.

🔍

Domain Rating has softened slightly (23 → 20)

DR has dipped a little since November, suggesting some backlinks have weakened. A focused link-building effort — using the whitepaper and calculator as linkable assets — would rebuild authority and accelerate organic recovery.

Other Notable Findings

📖

About page — deep purchase-consideration signal

581 sessions averaging **4 minutes 4 seconds** on the About page — well above site average and consistent with visitors researching the company before making contact.

Vacancies traffic dominates overall numbers

The top 4 pages by traffic are all job listings, accounting for 10,000+ sessions. The commercial metrics — contact forms, calculator, service pages — are the meaningful signal for business performance.

Vialto app page — possible technical issue

386 sessions but only 7% engagement rate — anomalously low. Could indicate bot traffic, a broken redirect, or a page that exits immediately. Worth investigating directly.
